

MEMORANDUM

TO: Referral Agencies
FROM: Bob Narracci - Community Development Planning Manager
DATE: March 12, 2010

RE: LEA-2624 Mid Valley Metro District Storage Building and Laboratory

Background: Proposal is to construct a storage building and laboratory on the existing Mid Valley Metro site. The building will have four bays to store equipment needed for the operation of the existing wastewater treatment plant. The building will also be used to store spare parts that are used to maintain the system. The existing onsite laboratory and office will be relocated into the new building and the existing space these uses currently occupy will be used to increase the number of blowers that will be required when the plant expands to its maximum approved capacity of 0.99 million gallons per day. In the interest of resource conservation and document management we are asking referral agencies to review this application online at the following location on Eagle County's web page.

Comments can be sent via email bob.narracci@eaglecounty.us or mail to Bob Narracci c/o Eagle County Community Development PO Box 179 Eagle, CO 81631 by April 2, 2010.

Sincerely,
Bob Narracci
Planning Manager
